

ADVANTAGES

- Designed to ease installation in confined areas.
- Integrated plenum for reduced resistance with face-mounted prefilter.
- Overall footprint reduction of 50% when compared to traditional 12-inch filters.
- V-bank design for units with limited space.
- MERV 13/13A, MERV 14/14A and MERV 15/15A.

Application	Suitable where no downstream space exist and where best-in-class Durafil ES3 is desired.
Installation Options	Installed with 6" style spring fasteners into existing HVAC filter frames. Clips required to hold 2-inch prefilter to face are C-84-2. For 4-inch, use C-84-4
